 **TRUCKEE DONNER**  
Public Utility District

Truckee Donner Public Utility District  
Customer Water Leak Repair Rebate Program (\$100)

Truckee Donner PUD has been implementing its Water Meter Program as required by California State law. One feature of the new water meters is the ability to remotely detect water leaks on the customer-side of the water meter. Since the District began installing meters in the summer of 2009, we have found that over 10% of our customers have leaks on water or irrigation piping and/or fixtures. Water leaks can be very costly if not repaired and, once customers start paying for the actual amount of water they use, water leaks will cause higher bills.

The District has been sending letters to customers with leaks notifying them of a leak, explaining that it is the customer's responsibility to fix the leak, and offering information about how the customer can locate a leak. Included in this letter are leak detection kits that can be used to test for leaky toilets and information on how to inspect fixtures for leaks. Some customer leaks may require the services of a licensed plumbing contractor to locate and repair the leak. Common culprits are the line from the water meter to the house, irrigation systems, water heaters, toilets, faucets, and improperly seated stop and drain valves.

TDPUD wants to help you offset the cost of locating and repairing the leak(s) by offering a \$100 rebate.

**To qualify**, you must have received a leak notification letter from the TDPUD, use a licensed plumbing contractor to fix the leak(s), provide a copy of the receipt from the contractor indicating that the leak was repaired, and TDPUD staff must verify that the leak has been repaired. **You may only receive this rebate one time.**

**To apply**, just complete this application form and return it to TDPUD along with a copy of an invoice from a licensed plumbing contractor for your repairs.
